trial!

Why the Biomedical Research Collection?

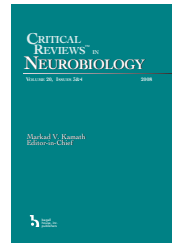

- Prestigious Critical Reviews
- Only peer-reviewed journals in the world on Plasma Medicine & Medicinal Mushrooms
- Translated content for many titles provides global perception of subjects
- Distinguished International Editorial Boards
- Complimentary access to available journal backfiles while subscribing
- All journals are indexed by PubMed
- Complimentary access to available journal backfiles while subscribing
- Perpetual access and archiving through PORTICO
- COUNTER compliant usage statistics
- Links to full text through CrossRef
- Easy access via Google Scholar
- Ranked in the Science Citation Index

The Biomedical Research Collection is part of the Begell Digital Library, a growing collection of online content that provides the latest advancements in biomedical sciences and other medical research. Deeply discounted subscription options are available to the full Biomedical Collection of all 18 peer-reviewed journals.

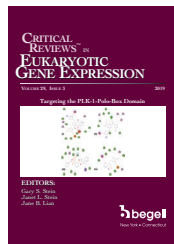

Critical Reviews™ in Biomedical Engineering

Deals with the application of concepts drawn from engineering, computing, communications, mathematics and the physical sciences to medicine and biology.

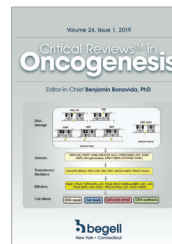

Critical Reviews™ in Neurobiology (Archive Only)

This journal publishes reviews and significant contributions from a wide range of areas related to neurobiology in the context of their impact on important clinical problems.

Critical Reviews™ in Eukaryotic Gene Expression

Makes available timely concepts and experimental approaches contributing to rapid advances of gene regulation, organization and structure.

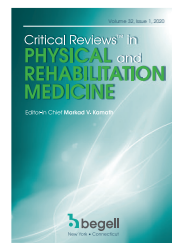

Critical Reviews™ in Oncogenesis

Dedicated to extensive reviews on topics of current interest in basic and patient-oriented cancer research.

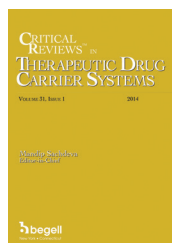

Critical Reviews™ in Immunology

Provides timely review articles and pertinent data in the vast immunological field from highly clinical to cellular and molecular.

Critical Reviews™ in Physical and Rehabilitation Medicine

Makes available critical assessments of all healing technologies, well-established diagnostic methods, clinical modalities and rehabilitative methodologies for etiologies amenable to treatment by physical medicine.

Critical Reviews™ in Therapeutic Drug Carrier Systems

Publishes authoritative, objective, comprehensive, multidisciplinary critical review papers with emphasis on drug formulation and delivery systems.

International Journal of Physiology and Pathophysiology

This journal is focused on publishing of original papers in physiology, pathophysiology and experimental medicine. The main aim of the Journal is to provide rapid dissemination of novel scientific data and to engage clinical practitioners in advanced basic science.

Ethics in Biology, Engineering and Medicine

International multidisciplinary publication of original contributions concerning the ethical issues in biology and biomedical research, the development of new biomaterials, implants, devices, treatments and bioengineering ethics.

Journal of Long-Term Effects of Medical Implants

Presents interdisciplinary aspects of implants in every organ of the human body to elucidate the mechanics of their success and failure and social impact.

Forum on Immunopathological Diseases and Therapeutics (Archive Only)

The workshops cover topics that include biochemistry, immunology, molecular biology, genetics, molecular and cellular mechanisms of disease, clinical studies and new innovative therapies.

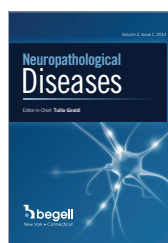

Journal of Environmental Pathology, Toxicology and Oncology

Presents research on ecological effects on the structure and function of cells and tissues with emphasis of the environmental effects of carcinogenesis.

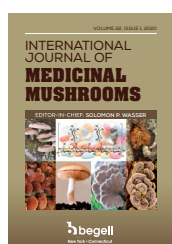

Hydrobiological Journal

Contains the premiere Eastern European periodicals in aquatic biology and aquatic ecosystems and covers physiology, biochemistry, systematics, ecology, conservation of freshwater fish, invertebrates, vascular plants, zoo and phytoplankton, with freshwater quality and toxicology.

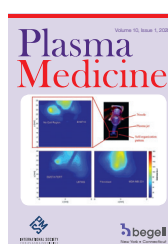

Neuropathological Diseases (Archive Only)

Studies the role played by psychological factors, through functions of the central and autonomic nervous system and of the neuro-endocrine network, in pathology and therapeutics.

International Journal of Medicinal Mushrooms

The journal is a primary forum for medicinal mushrooms research and contains a broad range of original and primary research and critical reviews, including systematics, nomenclature, taxonomy, morphology, medicinal value, and biotechnology.

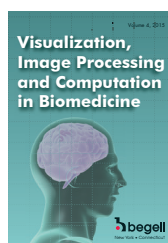

Plasma Medicine

The aim of this journal will be to provide a forum for discussion of topics such as: the variety of medical applications of plasma such as wound healing and cancer treatment, experimental work on the topic that has been done by major research institutions and understanding of the various mechanisms by which plasma can interact with living systems.

International Journal on Algae

Journal provides original studies of algae and related science including: morphology, anatomy and cytology; reproduction and life cycles of algae; genetics, physiology, biochemistry and biophysics; ecology, coenology, conservation, fossil algae; taxonomy, and more.

Visualization, Image Processing and Computation in Biomedicine (Archive Only)

Evaluates novel processes and for visual presentation of imaging paradigms that are emerging in biomedical imaging.
